

AD Feasibility Assessments

Agile & Reliable Biogas Projects at Scale

What is anessa AD•A?

Using industry-leading end-to-end predictive analytics, AD•A is a comprehensive software platform that assists you in conducting technical and financial anaerobic digestion project assessments. The platform facilitates internal and external collaboration and makes it easy to grow your business across various jurisdictions and countries.

Who uses anessa AD•A?

- Engineers
- EPCs
- Investors
- Developers
- Processors
- Consultants

Designed to support your varied workflows and use cases, AD•A works well with multidisciplinary teams and partners.

Where can AD•A help you?

anessa AD•A can efficiently conduct different assessment levels, help you answer client questions, and account for changing values faster than ever.

anessa Assurances:

- Your data is secure and encrypted
- Your results are derived from accepted scientific and engineering sources and never influenced by commercial bias
- Your inputs are easy to review, preventing costly human errors

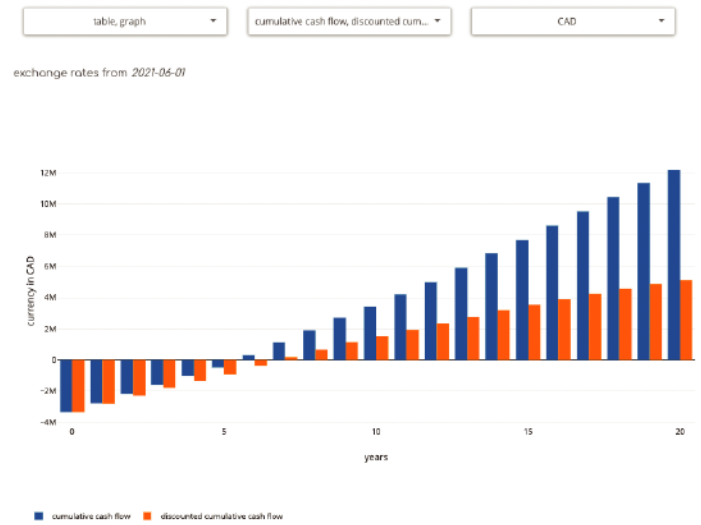

Collaboration, anyone?

Depending on the project, you can opt to go solo or collaborate within the same platform, on the same projects. It does not matter where in the world your collaborators are, they can participate within a very secure environment. anessa's team of biogas experts is also available to help you at every turn. Each project can be created with your choice of imperial or metric units and currency. You can have all calculations accurately converted at any time while working inside the platform. It's that simple.

Is Your Workflow Agile or Constrained?

As biogas projects become more and more diverse and are deployed in different technical and financial settings, anessa AD•A's expansive capabilities and proven technical and financial predictive analytics are the way forward. It's time to get the right platform for a growing, maturing, and more competitive sector.

baseline cashflow analysis

1. Only Winners

anessa AD•A helps sort through project proposals so that you only spend time on those that have the fundamentals necessary to become winning projects for all stakeholders.

2. Value Visualization

Easily showcase the value of your project to stakeholders using AD•A. Examine financial and technical values and navigate through meetings with ease. anessa helps you defend your project in both a graphical and numerical capacity.

3. Assessing

Dive into an in-depth assessment of your project. Our platform's flexibility allows you to replace assumptions with the most realistic values to reflect the true nature of the project, allowing you to sharpen your results. Account for your goals and reach the true potential of your project.

4. Risk & Rewards

Mitigating risk and structuring a project for success is where AD•A truly shines. There is no room for bias or half-truths when the objective is for all stakeholders to back and be rewarded by a successful project.
